

Wastewater Services

For the Chemical Industry

Everyone at *TM Deer Park Services* is deeply committed to attentive service, regulatory excellence, and innovative solutions—qualities which have established us as a leader in waste water management for the Chemical Industry. Our mission is to provide effective solutions that are of great value and safe for the environment.

Delivering Safe & Effective Management of Chemical Industry Wastewater

Examples of chemical industry wastewaters we accept:

- Water with toxic constituents such as metals
- Water with limited or “no-discharge” components
- Water with soluble and water miscible organics and solvents
- Acids and bases with organics or inorganics

TMDP Lowers Risk for Chemical Manufacturers by Offering

- Non-discharge to waterways
- Non-recoverable waste disposal
- MACT and LOREX applications
- Safe and regulatory compliant facility

Additional Benefits of Our Services

Large capacity —over 60 million gallons per year injected on average over the last five years. Ability to manage one-time streams, projects in the millions of gallons, or routine wastes shipped every day or week.

Lower cost and more efficient than other technologies such as incineration

Underground injection is an environmentally friendly, low carbon footprint disposal process which offers low air emissions, no discharge to waterways, and no risk to groundwater

Permits allow a wide range of D, F, K, P, and U waste codes and constituents

24/7 acceptance of most waste streams

Ability to process and inject 0-14 pH without neutralization provides cost effective management of streams by often eliminating the need for costly on-site treatment

Class 1 underground
injection wells
are safer than virtually
all other waste disposal
practices, according to the EPA.

—EPA Report 570/9-91-031
